**Additional Backup Information**

The Capital Metropolitan Transportation Authority (CMTA) is realigning the CMTA MetroRail tracks from Plaza Saltillo Station to IH-35, and the new alignment will cross an existing 24-inch diameter water line within the Navasota Street right-of-way. As part of the CMTA project the Austin Water Utility has agreed to fund a portion of the negotiated cost of replacing the existing water line with a new 24-inch diameter water line installed in casing pipe to provide protection to the line and aid future maintenance of the line without interruption of rail service.

Due to the compressed schedule of the project driven by the need to reduce the duration of interruption to the CMTA MetroRail service, as well as the greater potential for unknown subsurface conditions and utility conflicts when working in the downtown right-of-way, a 10% contingency in funding has been included to allow for the expeditious processing of any change orders.

The Project location is within zip code 78702 (District 3).

This project is managed by the Public Works Department.
